

When an LHC is ready to start the Run Offering for their Rotation, they can go to this menu to begin creation.

A URR OFFERINGS: This menu allows the LHC to see any previously created Run Offerings for their Facility

B FILTERS: Modify information viewed for Offerings. User filter settings can be saved for future use. Filters can be used to view overall information or drill down to specific details.

C ADD DOCUMENT: Select this button to begin Run Offering creation, and select the Unassigned Run Rotation Document.

D URR FIELDS: Enter in all the appropriate fields for this Run Offering, for this Facility:

- **Rotation Type:** Choose AM, PM or Teams
- **Origin/Additional Pt/Destination:** Enter in the appropriate Location details of the Run
- **Ready Time/Meet Time/Arrival Time:** Enter appropriate times for the Run
- **Notes:** Enter any notes you wish the TSP AO/BC for the Run
- **Add Run:** Select this to add another Run to the Run Offering. You can add as many as you wish.

E SAVE: Save Run Offering when Done

Once Saved, the URR Offering is in “Drafting” mode. In this mode any changes can still be made, including adding or deleting Runs. No communications have gone to the TSP AO/BCs in this status yet. Note that the screen will automatically refresh once the Run is started so there is no need to manually refresh.

The screenshot shows the 'Unassigned Run Rotations' page for batch number 7378. The details panel shows the run is in 'Drafting' status. The 'Available Runs' table has one entry with status 'Available'. Callout A points to the status dropdown, B to the 'ADD RUN' button, C to the full-screen icon, and D to the status field.

Status	Run #	Origin	Additional Pt.	Destination	Ready Time	Meet Time	Miles	Arrival Time
Available	1	0034 CONCORD PORTEX (KEERN)	Select Additional Point	0034 CONCORD PORTEX (KEERN)	09:00	hh:mm	234	09:00

A AVAILABLE RUNS: Any runs entered can be viewed and edited in this table in Drafting mode.

B ADD RUN: You can add another run in this table view if you prefer this mode to the detail panel for faster entry.

C FULL SCREEN: If you prefer you can click this icon to work on the Run Offering in Full Screen mode.

D STATUS: The status field is a picklist that controls mechanisms and communications in the Run Offering. You can change a status by simply selecting the next status to move to, in this case, “Published” from Drafting.

Once Status is changed to Published and saved, the Run Offering will be texted and emailed to all relevant TSP AO/BC Vector users for that Run Rotation, for that Facility so that they can preview the Runs for that day. The TSP List used to match to Vector users is linked within the Run Offering. Note that for smaller facilities with smaller URR runs, you can move from Drafting to In Progress and skip Published.

Unassigned Run Rotation

[DETAILS](#) [ACTIVITY](#)

Rotation Details COLLAPSE

Batch Number	180
Batch Type	Unassigned Run Rotation
Uploaded By	FXG LHC 1
Facility ID	953
Rotation	AM
Linked TSP Ranking	18
Start Ranking	2
Current Carrier Rank	2
Current Carrier Making a Selection	
Posted Date	Dec 10, 2020 2:48
Status	Published

Available Runs

Run #	Origin	Additional Pt.	Destination	Ready Time	Meet Time	Miles	Arrival Time	Notes
1	2031 / TEST5 350 Ruby Road Keene, NH 3431		2031 / TEST5 350 Ruby Road Keene, NH 3431	09:00	hh:mm	234	09:00	Notes

Claimed Runs

Run #	Origin	Additional Pt.	Destination	Ready Time	Meet Time	Miles	Arrival Time	TSP Accepted	Confirmed Tractor	Driver ID (1)	Driver ID (2)	Notes
No data available												

Unclaimed Runs

Status	Origin	Additional Pt.	Destination	Ready Time	Meet Time	Miles	Arrival Time	Notes
No data available								

A STATUS: Once the status is changed to Published you cannot make any changes to the Runs as they are being offered to TSPs. You can only make changes in Drafting or Paused Status. The next Status is "In Progress".

B RUNS: All Runs in this mode are read only.

- C RANKING FIELDS:**
- **Start Ranking** indicates which Ranking number the Offering will start at.
 - **Current Carrier Rank** signifies the Ranking the Run Offering is currently at.
 - **Current Carrier Rank Making a Selection** signifies the Carrier Name currently making a Selection.

Once Status is changed to In Progress and Saved. The TSP AO/BCs will be notified in order of the TSP Ranking List when it is their turn. Each TSP will have a certain number of minutes to either Accept, Decline, or their turn will expire. Once all Tractors have been offered, the status of that Tractor will go to “Unavailable”, and the Run Offering will go automatically into a “Paused” Status.

No data available												

Unclaimed Runs

Status	Origin	Additional Pt.	Destination	Ready Time	Meet Time	Miles	Arrival Time	Notes
No data available								

A STATUS: Once the status is changed to In Progress, the starting rank TSP is notified that it is their turn and they will have a few minutes to make a choice. Then all TSPs will be offered in order of the Ranking List.

A Run Offering will only Pause if one of the following conditions occur:

- An LHC manually changes to Paused
- All Tractors are Unavailable
- All Available Runs have been Claimed or manually Covered

B AVAILABLE RUNS: All Runs in this mode are read only.

C CLAIMED RUNS: If any TPS claims a Run it will appear in this table with the Driver and Tractor Id they entered. If they update the Claim Run Offering later with a different Driver or Tractor Id, it will also update in this table.

Once Status is changed to Paused and saved by the LHC, or the Offering is automatically Paused, then the LHC can make any changes to the Runs as if it was in Drafting mode. If manually changed, any current TSP making a choice is notified that the Run Offering is Paused and that they will be the first to choose when the Run Offering is re-started.

Covering / Covered Runs

Status	Ru #	Origin	Additional Pt.	Destination	Ready Time	Meet Time	Miles	Arrival Time	Covered By	Carrier	Tractor	Notes
Covered	2031 / TEST5	350 Ruby Road Keene, NH 3431		2031 / TEST5 350 Ruby Road Keene, NH 3431	09:00	hh:mm	234	09:00	Select			Notes

A STATUS: Once the status is changed to Paused you can make any changes to the Runs as if it was in Drafting mode. You can:

- Add new runs
- Edit runs
- Manually cover runs
- Manually change Tractor availability

B ADD RUN: Select this to add a new run or edit existing run details in the table.

C COVERED RUNS: If you wish to cover a run a manually, change the Status of that Run to "Covering". This moves that Run to the Covered Runs table.

Enter if it was covered by TSP, Purchased or Other in the Covered By Column

Enter the Carrier and Tractor Id if known and any Notes.

Change Status to "Covered".

TSP/Tractor Availability

TSP Rank	Carrier	Tractor	Availability	Notes
1	Creswell Web Trucking	158047	Available	
2	Creswell Mobile Trucking	151400	Unavailable	

D TRACTOR AVAILABILITY: You can change any of the Tractors in the TSP List to Available or Unavailable in the Paused state and add any Notes. This is useful if for example the Tractor is back from a short run or they are on a Temp Assignment and therefore not available. Any unavailable Tractors are skipped when the Offering restarts.

Once Status is changed to Completed and saved, the Run Offering is closed and unshared from all the relevant TSPs. Only LHCs can see Completed Run Offerings. In addition, this will allow a new Run Offering to be created for that Rotation Type, for that Facility location.

- A STATUS:** Once the status is changed to Completed the following actions occur:
- The Run Offering is unshared from all TSPs.
 - New Run Offering creation is allowed for that Rotation Type and Facility.
 - Any Available Runs are moved to Unclaimed.
- B UNCLAIMED RUNS:** Any runs that were Available before the LHC changed it to Completed will be moved to this table.
- C EVENTS:** All events are tracked against this Run Offering in this table for later audit.
